

DULEN MANTHUKA

UNDERGRADUATE

PROFILE

I am 3 year Information Technology undergraduate at SLIIT, seeking an internship in Quality Assurance Engineering. Strong foundation in programming concepts, software development processes, Software Testing Life Cycle, quality assurance practices and Agile methodologies. Exposure to manual, functional, and regression testing and also test case design, defect tracking, and bug reporting. Currently Advancing my skills in test Automation.

DEVELOPMENT PROJECTS

■ Heatn'Eat

Prepped Meals Ordering System (Web Application)

Heatn'eat is a smart food web application offering personalized meal plans, calorie tracking, and delivery order tracking. The four-member development team worked using the Agile-Scrum methodology on this project. API testing and manual testing were executed to ensure proper functionality.

Role : Full Stack Developer **Technologies : React, ExpressJS, MongoDB**

🔗 github.com/dulenManthuka/Prepped-Meals

■ VMS

Volunteer Management System (Desktop Application)

Built using OOP concepts, the system allows users to sign up as volunteers and assign themselves to projects of their choice. A four-member team collaborated on requirements, UI design, implementation, and testing.

Role : Full Stack Developer **Technologies : Java Swing , MySQL**

🔗 github.com/dulenManthuka/Volunteer_Management_System

■ Event Master

Event Management System (Web Application)

Focused on enabling customers to book appointments with event planners, explore vendors' work, and receive services from them.

Role : Full Stack Developer **Technologies : Html , CSS , JS , MySQL**

EDUCATION

- **B.Sc. (Hon's) in IT – Information Systems Engineering** 2023 - Present
SLIIT
- **G.C.E Advanced Level Technology Stream** 2022
Sivali Central Collage - Ratnapura
1B, 2Cs
- **G.C.E Ordinary Level** 2019
Mihindu Collage - Ratnapura
8 As, 1C
- **Certificate Course in English** 2019
British Council

TECHNICAL SKILLS

Programing Languages:

- C
- C++
- Java
- JavaScript
- Python
- R

Front end Development:

- React
- CSS/Tailwind CSS
- HTML

Back end Development:

- ExpressJS
- PHP

Database:

- MongoDB
- MySQL
- MSSQL

Test Automation:

- Selenium

API Testing:

- Postman

Project Management Tools:

- Jira
- Trello

OTHER PROJECTS		Version Controlling: GitHub
■ Test Automation Using Selenium E-Commerce Website (SauceDemo) Automated core e-commerce workflows on the SauceDemo web app, including login, add-to-cart, checkout, and sorting, using CSS selectors for element identification and currently learning XPath. I am still in the learning phase, expanding test coverage and improving my test automation framework skills. Technologies : Java, Selenium WebDriver, TestNG, Maven github.com/dulenManthuka/Selenium-automation-saucedemo ■ Information Systems Analysis Project Smart Farming System (Solution & System Design) Focused on developing a solution to help farmers optimize crop production and reduce food waste by analyzing data and providing actionable insights. drive.google.com/dulenmanthuka/InformationSystemsAnalysis		UI/UX Design: - Figma IDEs: - VS Code - IntelliJ Idea - Eclipse Others: - R Studio - Odoo
ACHIEVEMENTS		SOFT SKILLS
■ 1st Runners-up - ISP Project Showcase 2025 Organized by ISESC, Department of Computer systems Engineering SLIIT Heatn’Eat – Prepped Meals Ordering System (Personalized Meal Planning & Delivery Platform)		- Effective Communication - Flexible, friendly teamwork - Problem-solving - Designing solutions - Leadership - Team Leader - Project Heatn’eat - Year two web Application project. - Team Leader - Project VMS - Year two desktop application project.
CERTIFICATIONS		INTERESTS
